**MCTRI Materials Science Institute -  
Marmara Research Center - TUBITAK (Istanbul, Turkey)**

The Materials and Chemical Technologies Research Institute at TÜBİTAK Marmara Research Center, serves the Turkish Industry by performing material & chemical testing, analysis, characterization and product/process development activities along with consulting and training. The activities of MCTRI can be divided into 3 main categories: (i) Strategic research projects (in-house projects); (ii) Contractual research and development projects (industrial projects); (iii) Scientific and technological services (Product/process development, testing, analysis and characterization, consulting and training). Since 1995 MCTRI has been collaborating with ceramic workshops and producers in the Iznik and Kutahya regions in order to improve quality and yield of production units dedicated to the authentic reproduction of Iznik ceramic ware.
